

## Smart Payment Plan (SPP)

The logical, you could even say **'smart'**, way to acquire business management solutions

### 5 reasons

why the Smart Payment Plan is annoyingly smart:

- ☒ No need to compromise on the solution you need
- ☒ Accelerated ROI and reduced TCO
- ☒ Stay ahead of your competition
- ☒ Tax efficient way of funding your software acquisitions
- ☒ Flat rate manageable monthly payments

# Smart Payment Plan (SPP)

With the Smart Payment Plan from Zafire you get all the benefits of a business management solution that meets your exact requirements with zero hassle when it comes to funding the project.

Smart Payment Plan offers a range of innovative payment methods to our clients turning traditionally large upfront capital costs, normally associated with complex software acquisitions, into flat manageable monthly operational payments.

Designed to offer you flexibility, total project costs can be incorporated in your Smart Payment Plan including software, implementation, consulting, training, on-going support and system upgrades even system customisations specific to your requirements. By combining all aspects of the acquisition into your Smart Payment Plan you can reduce your total cost of ownership (TCO) whilst at the same time simplifying budgeting and planning.

## Key benefits to your business:

**NO NEED TO COMPROMISE** – everything you need from the outset rolled up into one neat package. Maximise productivity today whilst planning for tomorrow.

**ACCELERATED ROI** – with deals financed by capital, return on investment can sometimes take years to achieve, with SPP returns are faster and can far outweigh the payments made.

**STAY AHEAD OF THE COMPETITION** – with regular upgrades and on-going support SPP ensures you have access to the latest software keeping you ahead of your competition.

**TAX BENEFITS** – monthly payments can sometimes be offset against taxable profit and may therefore reduce your tax bill.

**FLAT RATE MANAGEABLE MONTHLY PAYMENTS** – select a plan which suits your company's budget and cash flow with no large annual service or support charges to pay during the contract.

**"It's important to us that our clients have the right solution from the outset to help drive their businesses forward. However, we understand the complexities of managing budgets whilst maintaining a strong cash flow and retaining cash reserves for strategic investment. Our Smart Payment Plan does just that."**

Chris Beling,

Commercial Director at Zafire Limited.

## The Smart business management solution:

Smart provides an end-to-end capability that allows organisations to effectively deliver the services their customers demand whilst consistently growing profits. The breadth of scope and depth of capability on offer coupled with inbuilt flexibility creates a business management solution that is truly unparalleled.
