PRESS RELEASE

Zafire Aviation Partners with Innovative Software SARL to Enhance Aviation Software

New Partnership Aims to Improve Airport Operations with Advanced Connectivity

Banbury, United Kingdom, 08.07.2024 – Zafire Aviation, a leader in aircraft turnaround software solutions, has announced a strategic partnership with Innovative Software SARL, developers of the aviation messaging solution EDIfly. This alliance is set to improve aviation software by increasing efficiency and security in communications for airlines, airports, and service providers globally.

The collaboration will see the integration of EDIfly's messaging and transmission technology into Zafire Aviation's FIRST suite of aviation management solutions. This initiative aims to create a comprehensive, secure communication platform that simplifies operations and protects data integrity across various aviation activities. By combining Zafire Aviation's expertise in aircraft turnaround with Innovative Software SARL's encrypted messaging services, the partnership is expected to deliver enhanced operational efficiency, control and data security to the aviation industry.

Paul Lynch, Group Managing Director of Zafire Aviation, commented on the partnership, "By incorporating Innovative Software's EDIfly solution into our FIRST suite, we are taking a significant step towards providing the aviation industry with superior operational tools. This collaboration will help set new standards for what aviation software can achieve."

Richard Stokes, CEO of Innovative Software SARL, also noted, "This partnership with Zafire Aviation allows us to broaden the reach and effectiveness of our EDIfly community messaging solution. Our commitment to innovation and excellence is likely to lead to significant developments that will benefit the global aviation community."

Zafire Aviation is known for its solutions that streamline aircraft turnaround operations, thereby improving efficiency and the passenger experience. Innovative Software SARL has transformed secure and efficient communication within the aviation industry with EDIfly.
